Comprehensive Internet Training 24x7

The Respiratory Systems and Technologies (RST) course is a self-paced, internet-based training program designed for Biomedical Equipment Technicians who are responsible for the maintenance and repair of respiratory care equipment. The RST eTraining program provides an excellent, cost effective educational opportunity for those who need to transition from general biomedical to ventilation and other respiratory care technologies. The topics covered are Cardiopulmonary Anatomy and Physiology, Respiratory Terminology, and Respiratory Technologies.

Interactive, Educational, & Fun

Three comprehensive modules
